

Working together for animal health

@EpicScotland
epicscotland.org

EPIC, the Scottish Government-funded Centre of Expertise on Animal Disease Outbreaks, provides scientific evidence to support policy makers in the prevention of, preparation for and eradication of important animal disease outbreaks.

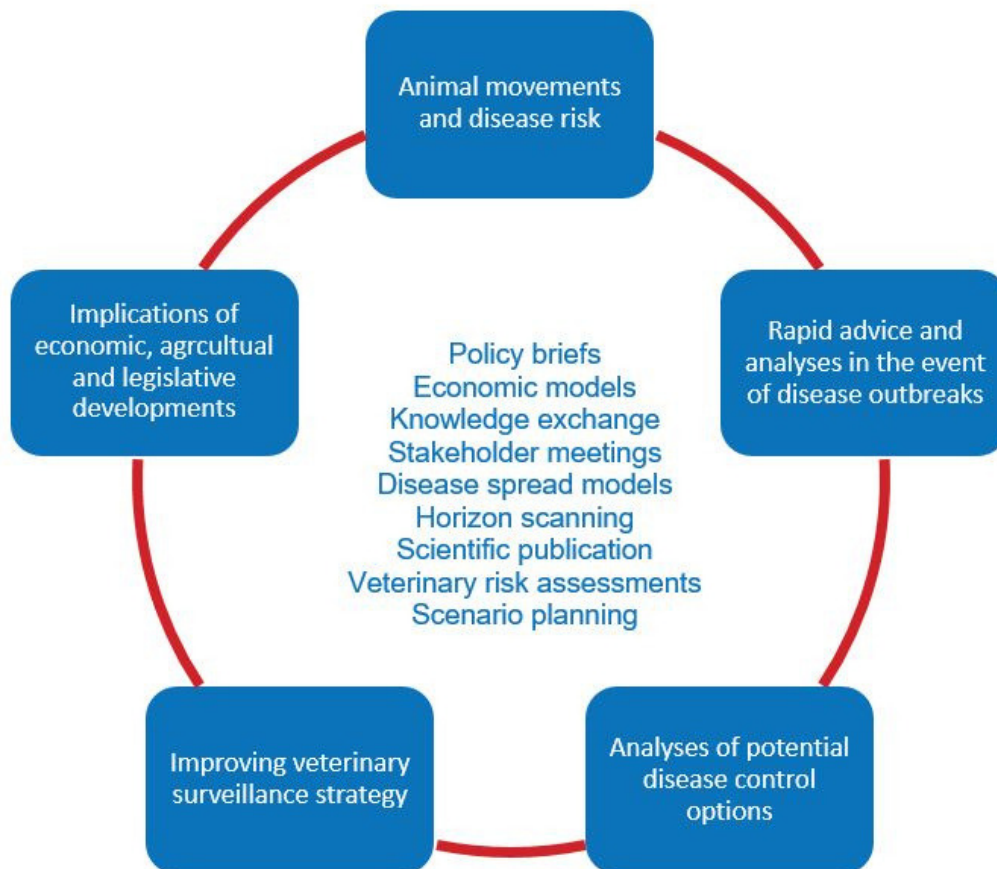

EPIC is a multi-disciplinary consortium comprising seven research partners across Scotland

Veterinary Epidemiologist

Geographer Social Virologist Ecologist Risk Spatial Parasitologist Policy
 Mathematical Knowledge Applied Statistical Economist Statistician
 Scientist Modeller Data Quantitative Avian Welfare Biologist Project Animal
 Human Software Landscape Impact Health Engineer Assessment Value
 Molecular Research Exchange

Prevention

Animal diseases studied by EPIC scientists

EXOTIC DISEASES

- Foot-and-Mouth Disease
- Bluetongue Virus
- African Horse Sickness
- Schmallenberg Virus
- Avian Influenza
- African Swine Fever
- Classical Swine Fever
- Porcine Epidemic Diarrhoea Virus
- West Nile Virus
- Cervid Transmissible Spongiform Encephalopathy

ENDEMIC DISEASES

- Psoroptic Mange (Sheep Scab)
- Bovine Tuberculosis
- Fasciolosis (Liver Fluke)
- Louping Ill Virus
- Bovine Viral Diarrhoea

DISEASE VECTORS

- Midges
- Ticks
- Mosquitos
- Mud Snails
